

Master's Programmes

Programme dossier, with an in-depth section on the
Master of Supply Chain Management (M.SCM)

Compiled 29 September 2026 · All fees in Nigerian naira (₦) unless marked

Compiled from Miva's live programme pages, the NUC-related record on Wikipedia, one third-party fee guide, Miva's Digital Learning Tools page, a Times Higher Education profile and the National Universities Commission (NUC) academic-standards documents. All fees are in Nigerian naira (₦), as published by Miva; the dollar figure Miva prints beside each is shown in grey. "n/s" means not stated on the page.

8

master's programmes listed, plus

1. The institution: fixed facts

15 May 2023

NUC licence granted

uLesson Group

Founder; Sim Shagaya is
Chancellor

Abuja

Primary campus; delivery is online

8

Master's programmes listed, plus
1 doctorate (DBA)

- Type: private online university. Vice-Chancellor: Prof. Tayo Arulogun.
- MBA launched 2 April 2024. MPA launched 7 October 2024.
- NUC approved the MPH and MIT on 7 February 2025, for the 2024/2025 session.
- April 2026: NUC full accreditation for twelve programmes. The sources do not say which twelve.
- Newer additions: M.CSM, M.SCM, M.ISD, Master of Artificial Intelligence, and the DBA (the M.CSM, M.SCM and M.ISD pages were published 28 April 2026).

2. Programme register

Programme	Length	Per semester	Full tuition	Tracks
MBA	4 semesters (18 months)	₦320,000 \$350	₦1,100,000 \$1,250	Entrepreneurship & Innovation; Finance; Management; Marketing & Strategy; Human Resource Management; AI & Data Analytics
MIT	3 semesters (max 6, 24 months); 54 credit units	₦320,000 \$350	₦850,000 \$950	Artificial Intelligence; Cybersecurity; Software Engineering; Information Management Systems
MPA	3 semesters	₦250,000 \$320	₦680,000 \$845	Public Administration; Public Policy; Human Resource Management; Security & Strategic Studies
MPH	4 semesters	₦250,000 \$320	₦900,000 \$1,100	Epidemiology; Health Education & Health Promotion; Environmental Health; Health Policy & Management
M.CSM Criminology & Security Management	3 semesters	₦250,000* \$320	₦680,000 \$845	Military Security & Intelligence Operations; National Security & Strategic Intelligence; Forensic Policing & Ethical Law Enforcement; Border Security & Anti-Smuggling
M.SCM Supply Chain Management	3 semesters	₦250,000* \$320	₦680,000 \$845	Logistics & Operations; Procurement & Strategy; Technology & Digital Analytics; Global Supply Chains
M.ISD International & Sustainable Development	3 semesters	₦250,000* \$320	₦680,000 \$845	International Development; Green Development; Development Studies
Master of AI	n/s	n/s	n/s	n/s. Listed on the master's hub; its programme page returned a 404 error on 28 Sept 2026.

* The M.CSM, M.SCM and M.ISD pages print only the dollar semester fee (\$320). The same \$320 rate is ₦250,000 on the MPA and MPH pages, so ₦250,000 is carried across; the ₦680,000 full figure is printed on all three, struck through. MPH naira figures come from the MPH home page, which prints ₦250,000 and ₦900,000. The programme pages label "Full tuition" as "pay per session"; the MIT FAQ calls its figure the fee "for the complete programme".

3. Entry requirements

Standard set (MBA, MPA, MPH, M.CSM, M.SCM, M.ISD, and the MIT programme page)

- Bachelor's degree in any field, minimum Second Class Lower Division (2:2).
- HND in any field, minimum Upper Credit, "may be considered".
- Lower results need a Postgraduate Diploma (PGD). Without a PGD: at least 3 years of work experience.
- Five O'Level credit passes.

Variations

- **MPH, Epidemiology track:** health-related degree at 2:2 or better; HND holders need a health-related PGD; O'Levels must include English, Mathematics, Biology, Physics and Chemistry.

- **MIT home-page FAQ:** relevant bachelor's with minimum 2.5 CGPA, or PGD with minimum 3.0 CGPA, or at least two years of relevant work experience. The same FAQ also says two years of post-bachelor's experience is required.
- **MPA legacy tuition page:** minimum 2 years of post-bachelor's experience; longer for lower results.
- **M.CSM, M.SCM, M.ISD FAQs:** a degree in a related field is "typically expected"; work experience is not mandatory.
- International applicants: same academic rules; proof of English proficiency may be requested.
- No application fee (stated on the MIT page). Miva's admissions page says an acceptance letter arrives by email within 24 hours for eligible applicants. One third-party guide reports no entrance examination for master's programmes.

4. Delivery, assessment, support

- Study level label on the MBA, MPA, MPH, M.CSM, M.SCM and M.ISD pages: "Blended Learning". The MIT, M.CSM, M.SCM and M.ISD FAQs say "fully online".
- Examinations: the MIT FAQ states there are no in-person exams. Miva's Digital Learning Tools page (modified 12 May 2026) states that exams are held at physical centres in different states, with online proctored exams for students in the diaspora. Miva's undergraduate FAQ states in-person attendance is not compulsory. See Section 8.
- MIT learning inputs: video lessons, case studies, simulations, projects, masterclasses, workshops. Assessment: assignments, projects, quizzes, final examinations.
- Tools: virtual classroom on Miva's learning management system (class.miva.university), e-library, Career Advancement Centre, assigned Success Advisors.

5. Curriculum structure

Programme	Core load	Final semester	Elective rule	Practical component
MBA	Semesters 1 to 3: 6 core courses each	Technology Strategy & Change Management, Research Project, track electives	Minimum 3	Internship in Industry (semester 3)
MIT	Foundations, then advanced IT topics	Track courses and a master's project (3 units per course)	n/s	Virtual labs referenced in the course list
MPA	Semesters 1 and 2: 6 core each	4 core including Dissertation, plus track electives	Minimum 2	MPA Seminar (semester 2)
MPH	Semesters 1 to 3: 6 core each	Dissertation, Public Health Ethics, 2 track cores, electives	Minimum 2	Public Health Practicum (semester 3)
M.CSM	Semesters 1 and 2: 6 core each	Policing, Security & National Development; Gender, Crime & Policing; Dissertation; 3 track electives	n/s	Internship / Field Attachment (semester 2)
M.SCM	Semesters 1 and 2: 6 core each	Dissertation, Graduate Seminar, Internship, track electives	n/s	Internship in Industry (semester 3)
M.ISD	Semesters 1 and 2: 6 core each	Dissertation, Seminar Presentation, Internship, electives	n/s	Internship (semester 3)

6. Numbers derived from the published fees

Programme	Semesters × per-semester fee	Full tuition	Difference
MBA	4 × ₦320,000 = ₦1,280,000	₦1,100,000	₦180,000 (14.1%)
MIT	3 × ₦320,000 = ₦960,000	₦850,000	₦110,000 (11.5%)
MPA	3 × ₦250,000 = ₦750,000	₦680,000	₦70,000 (9.3%)
MPH	4 × ₦250,000 = ₦1,000,000	₦900,000	₦100,000 (10.0%)
M.CSM, M.SCM, M.ISD	3 × ₦250,000* = ₦750,000	₦680,000	₦70,000 (9.3%)

- This comparison holds only if "Full tuition" covers the whole programme. If it covers one session (year), the differences do not apply.
- Per-semester fees sit in a narrow band: ₦250,000 to ₦320,000. Full tuition ranges from ₦680,000 to ₦1,100,000.

- Miva's own naira and dollar price pairs imply rates from ₦781 to ₦914 per \$1, so the two currencies are not converted at one rate.
- Five of the seven priced master's run 3 semesters; the MBA and MPH run 4.

7. Intakes and deadlines

- Three cohorts a year: applications open February for May classes; applications open May for September classes; applications open October for January classes (January 2027 next).
- September 2026 cohort: programme pages state "apply before 30th September 2026". The M.CSM, M.SCM and M.ISD pages also carry an earlier 31 May 2026 date for the May cohort.
- Discount applies to full-year (upfront) payment. Monthly instalments are offered on the MIT page and in a third-party guide.

8. Conflicts between source pages

Item	Page A	Page B
MPA fees	Programme page: ₦250,000 per semester; ₦680,000 full	Legacy tuition page: ₦225,000 per semester; ₦675,000 full
Master's hub headline	Headline in dollars only: "from \$285 per semester, \$850 per session"	Lowest current programme fees: ₦250,000 per semester, ₦680,000 full
MPH fees	Programme page prints dollars only: \$320 and \$1,100	MPH home page prints ₦250,000 per semester and ₦900,000 full
MIT entry	Programme page: 2:2 / HND Upper Credit / PGD / 3 years' experience	Home FAQ: 2.5 CGPA / PGD 3.0 / 2 years' experience
Delivery mode	Summary box: Blended Learning	FAQ: fully online
Examinations	MIT FAQ: no in-person exams. M.SCM FAQ: fully online, "without physical attendance"	Digital Learning Tools page: exams held at physical centres in different states; online proctored exams for the diaspora
M.SCM tracks	Curriculum: Logistics & Operations; Procurement & Strategy; Technology & Digital Analytics; Global Supply Chains	FAQ: Inventory & Distribution; Strategic Procurement & Sourcing; Logistics & Operations; Global Supply Chain Systems
M.SCM page notices	Sept 2026 cohort: apply before 30 Sept 2026	Same page still carries a 31 May 2026 deadline and a banner for the "May 2025 academic session"
M.CSM, M.SCM, M.ISD fees	Pages show ₦680,000 full (struck through) and \$320 per semester	FAQs say full fee details are given during application
Third-party fee guide	Reports ₦225,000 per semester and ₦607,500 per session as the baseline	Both figures are below every current official price (lowest: ₦250,000 and ₦680,000)

9. Master of Supply Chain Management (M.SCM) in depth

Source: Miva's M.SCM programme page (published 28 April 2026, last modified 26 August 2026), read 29 September 2026. School of Postgraduate Studies. Course descriptions below are shortened restatements of the page.

3

semesters

15

core courses

12elective courses, in 4
third-semester tracks**27**

courses listed in total

9.1 What the programme covers

- Subject areas named by Miva: logistics, inventory management, procurement, demand forecasting, supply chain analytics, sustainable supply chain practices, global trade, operations strategy.
- Also covered: the ethical, regulatory and business implications of global supply chains.
- Method: theory combined with hands-on projects, real-world case studies and practical applications.
- Stated audience: graduates and professionals in business, engineering, logistics, economics or related fields.

9.2 First semester (all core)

#	Course	Status	Focus
1	Supply Management and Manufacturing	Core	How buying, production planning, stock control and supplier relations fit together; digital manufacturing, resilience, sustainability.
2	Logistics and Supply Chain Systems	Core	Designing and running end-to-end supply chains; digital integration; the Nigerian and wider African logistics setting (infrastructure, regulation).
3	Inventory and Warehouse Management	Core	Inventory control systems and warehouse operations, including e-commerce settings; analytical and digital tools.
4	Procurement and Strategic Sourcing	Core	Sourcing strategy, supplier relationships, contract negotiation, risk, digital procurement, public procurement in Nigeria.
5	Containerisation and Multimodal Transport	Core	Container systems, infrastructure and regulation; combining road, rail, sea and air freight; Nigeria.
6	Operations Management	Core	Design, planning, control and improvement of production and service systems; resilience and data-driven decisions.

9.3 Second semester (all core)

#	Course	Status	Focus
1	Distribution Management for Global Supply Chain	Core	Moving goods from production to final consumer; strategic, tactical and operational decisions; case studies and simulations.
2	Supply Chain Planning and Strategy	Core	Demand forecasting, network design, inventory optimisation, risk management, digital transformation.
3	Seaport and Airport Management for Logistics	Core	Port and airport operations, cargo handling, regulation, security; Nigerian port reforms and aviation logistics.
4	Research Methods in Supply Chain Management	Core	Quantitative and qualitative research methods, digital data tools, research ethics.
5	International Logistics and Management	Core	Cross-border trade, transport, documentation, regulation and risk.
6	Reverse Logistics and E-Commerce Fulfilment	Core	Returns, recycling, remanufacturing; warehousing, order processing and last-mile delivery; circular economy.

9.4 Third semester: three core courses plus one track

Every student takes the three core courses. Electives are then drawn from one of four tracks; each track lists three. The number of electives a student must take is n/s.

#	Course	Status	Focus
1	Dissertation / Project Report	Core	Independent research on a real logistics or procurement problem in Nigeria or Africa; method design, data collection, statistical analysis, digital tools; written dissertation and presentation.
2	Graduate Seminar	Core	Researching, summarising and presenting complex topics; peer review; virtual and hybrid seminar formats.
3	Internship in Industry	Core	Practical exposure to sourcing, production, logistics and distribution work; students produce reports, optimisation analyses and business-intelligence dashboards.

Track	Electives (all listed as Elective)
Logistics & Operations	Industry 4.0 and Global Logistics Systems; Operations Management and Process Optimization (Lean, Six Sigma, Total Quality Management); Warehousing and Inventory Management (EOQ, JIT, ABC/XYZ analysis, warehouse management systems, RFID, IoT).
Procurement & Strategy	Strategic Sourcing and Category Management; Procurement Policy and Strategy (public and private sector, Nigerian and African context); Supply Relationship Management and Contract Strategy.
Technology & Digital Analytics	Supply Chain Analytics and Innovations; Digital Twin and IoT in Operations; Artificial Intelligence in Global Supply Chain.
Global Supply Chains	Risk Management in Global Supply Chains; Global Sourcing and Supply Network Design (including total cost of ownership); Blockchain for Supply Chains.

9.5 Assessment, entry, fees, dates

- **Assessment (FAQ):** coursework, case studies, applied projects and supply chain analysis tasks based on operational and industry scenarios.
- **Entry:** the standard set in Section 3. The FAQ adds that a bachelor's in business, supply chain, logistics, engineering, economics or a related discipline is typically expected; relevant work experience is an advantage, not mandatory. Open to local and international applicants.
- **Support:** digital library, structured course materials, a dedicated success advisor, adjunct faculty network.

Fee item	Published	Derived
Per semester	\$320 (₦250,000* carried across from MPA/MPH)	3 semesters: \$960 or ₦750,000
Full tuition (early-bird, full-year payment)	\$845; ₦680,000 printed struck through	Difference to 3 semesters: \$115 (12.0%) or ₦70,000 (9.3%)
Implied naira rate	₦680,000 ÷ \$845 = ₦804.7 per \$1	₦250,000 ÷ \$320 = ₦781.3 per \$1
Closing date, September 2026 cohort	30 September 2026	One day after the compile date; next intake January 2027 (applications open October)

9.6 Career titles named by Miva

Management	Analysis and planning	Specialist and advisory
Supply Chain Manager Logistics Manager Procurement Manager Operations Manager	Supply Chain Analyst Procurement Analyst Demand Planner Inventory Control Specialist	Operations Consultant Warehouse & Distribution Manager Supplier Relationship Manager

9.7 Counts and patterns in the course list

- Course descriptions that name Nigeria or Nigerian directly: 14 of 27 (9 of the 15 core, 5 of the 12 electives). Another 4 refer to Africa, emerging or developing economies without naming Nigeria.
- Two elective titles closely resemble core titles: Warehousing and Inventory Management and Inventory and Warehouse Management; Operations Management and Process Optimization and Operations Management. The page does not state how their content differs.
- As standalone courses, analytics, digital twins and IoT, AI, blockchain and Industry 4.0 appear only as semester-3 electives. Practical work (Internship, Dissertation, Graduate Seminar) is confined to semester 3.

10. Screen time: what is required, what is mandatory

Short answer

Miva publishes no minimum number of screen hours, no weekly hour requirement and no compulsory live-attendance rule for the M.SCM. What is fixed is the course load (15 core courses) and the credit-unit standard set by the NUC. Applying that standard gives a taught-time estimate of **540 to 810 hours** across the three semesters (about 18 hours a week in semesters 1 and 2, about 9 to 18 in semester 3). The estimate rests on an assumption about credit units that Miva has not published for the M.SCM; the assumption is stated below.

10.1 What Miva states about how classes run

- Classes are asynchronous: no fixed class times or rigid timetables; study is at the student's own pace.
- Pre-recorded video lessons can be paused and replayed. Masterclasses and virtual live classes are offered for real-time discussion; Times Higher Education reports live lessons, small-group classes, breakout sessions and virtual office hours.
- Course materials, discussion forums, assessments, e-library and virtual labs sit on the learning platform.
- Examinations: held at physical test centres in different states; students abroad sit online proctored exams (Digital Learning Tools page). The M.SCM page itself describes the programme as fully online without physical attendance (Section 8).
- Not stated for the M.SCM: hours of recorded video per course, number or length of live sessions, whether live sessions are compulsory or graded, internship duration, dissertation hours.

10.2 The standard: how the NUC measures a credit unit

1 credit unit = 1 hour of lecture or tutorial per week × a 15-week semester = 15 hours per semester.
Hours per course = units × 15. A 3-unit course = 45 hours. A 2-unit course = 30 hours.

Activity	Equals one credit unit
Lecture or tutorial	1 hour per week per semester
Seminar	2 hours per week per semester
Laboratory, field work, clinical or studio practice	3 hours per week per semester
Teaching practice	6 hours per week per semester
Industrial attachment	4 weeks

Source: NUC Core Curriculum and Minimum Academic Standards (CCMAS), Sciences and Arts documents. These documents cover undergraduate programmes; the same unit definition is applied here to the M.SCM by analogy. The CCMAS also states a minimum credit load of 15 units per semester for degree programmes and encourages blended systems that combine physical contact with online platforms. A postgraduate figure was not found.

10.3 The assumption used for the M.SCM

- Miva has not published credit units for the M.SCM. Miva's MIT publishes them: 3 units per course, 6 courses per semester, 54 units over 3 semesters.
- The M.SCM has the same shape: 6 courses in each of semesters 1 and 2, and 6 in semester 3 (3 core plus one track's 3 electives) = 18 courses. At 3 units each that is 54 units, the same as the MIT.
- If M.SCM courses carry 2 units instead, multiply every hour figure below by $2 \div 3$.

10.4 Taught-time model (3 units per course, 15-week semester)

Component	Formula	Sem 1	Sem 2	Sem 3	Total
Core taught courses (semesters 1 and 2)	6 courses × 3 units × 15 h	270 h	270 h	–	540 h
Track electives (semester 3), if all 3 are taken	3 × 3 × 15 h	–	–	135 h	135 h
Taught total		270 h	270 h	135 h	675 h
Semester-3 core (Dissertation, Seminar, Internship), if each carried 3 units	3 × 3 × 15 h	–	–	135 h	135 h
Upper bound, all 18 courses	18 × 3 × 15 h	270 h	270 h	270 h	810 h
Weekly load, taught only	hours ÷ 15 weeks	18 h	18 h	9 h	
Weekly load, upper bound	hours ÷ 15 weeks	18 h	18 h	18 h	

- **Floor (core only):** 540 hours from the 12 core taught courses. The semester-3 core courses are project, seminar and internship work with hours n/s.
- **Daily equivalent:** 18 hours a week is about 2.6 hours a day over seven days; 9 hours a week is about 1.3 hours a day.
- **Not included:** independent reading and assignment work, assessment time, examination sittings, dissertation writing. A common US convention allows about 2 hours of independent study for each hour of class; applied to 675 taught hours that is about 1,350 further hours. That ratio is not a Miva or NUC rule, and part of this time would be on paper or offline.

10.5 What is mandatory and what is not

Item	Status	Basis
Completing the 15 core courses	Mandatory	Marked “C” (core) on the programme page
Internship in Industry	Mandatory (core); on-site work; duration n/s	Core course in semester 3; described as participation in real supply chain activities
Dissertation and Graduate Seminar	Mandatory (core)	Core courses in semester 3
Track electives	Mandatory to choose; number required n/s	Each track lists 3 electives
Examinations	Mandatory ; location conflicts between pages	Physical centres per Digital Learning Tools page; online per M.SCM FAQ
Minimum weekly or total screen hours	Not published	No figure on any Miva page read
Attendance at live masterclasses or classes	Not stated as compulsory	Described as offered; no attendance rule found
Fixed class times	None	Asynchronous delivery
